

OFT-WSSL16

Stainless Steel Lashing Wire Type 302 .038 1600'

Reference Picture

OFT-WSSL16 stainless steel mooring wire, with type SS302 stainless steel, wire diameter 0.038mm and presentation of (1200' to 1600') per coil. It combines good corrosion resistance and formability at a reasonable cost and is suitable for most environments.

The lashing wire is used for bundling and binding. It is soft and flexible, easier to bend and relax.

Technical Characteristics:

Model	Wire Diameter	Material	Pack
OFT-WSSL16	0.038mm	SS302	Roll (1200' to 1600')
