Who we are

We are a leading manufacturer in the telecommunications sector. With over 20 years of experience in producing high-quality products, we offer innovative solutions that combine an excellent cost-benefit ratio.

Our products include:

- **Optical Fiber:** Advanced solutions for efficient and fast data transmission.
- **Structured Cabling:** Robust and reliable systems for network infrastructure.
- **Metal Mechanics:** Precision metal components and structures for various applications.

The quality and competitiveness of our products have allowed us to establish a strong presence in over 15 countries in Latin America. At Cablix, we are committed to excellence and customer satisfaction, providing products that meet the highest industry standards.

Trust Cablix for all your telecommunications needs and discover why we are the preferred partner in the region!

FIBER OPTIC CABLES

ADSS

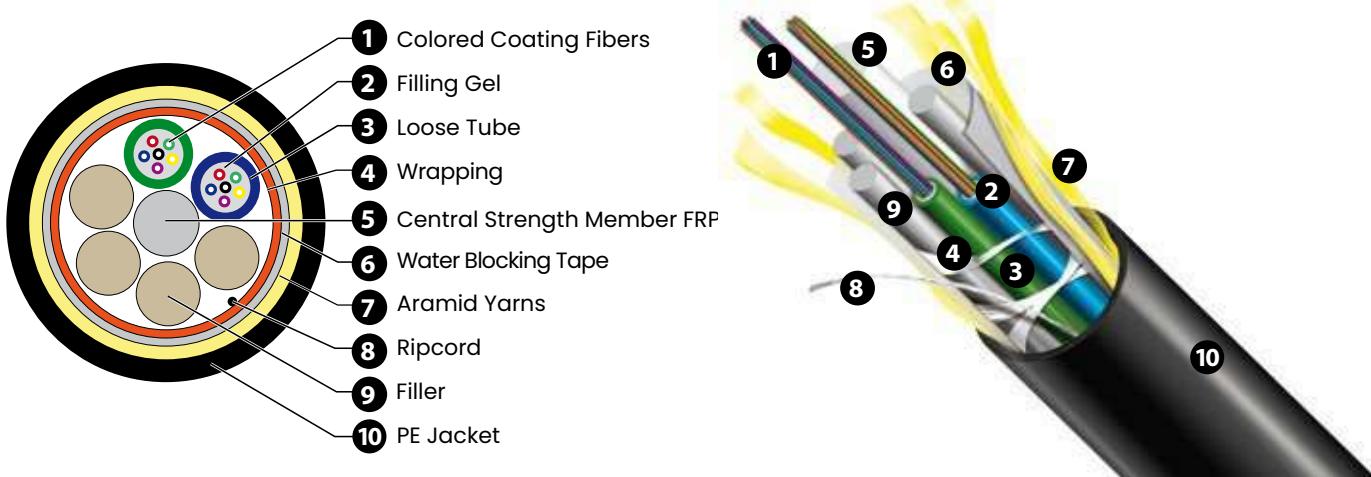

All-Dielectric Self-Supporting
FIBERS

Cablix™

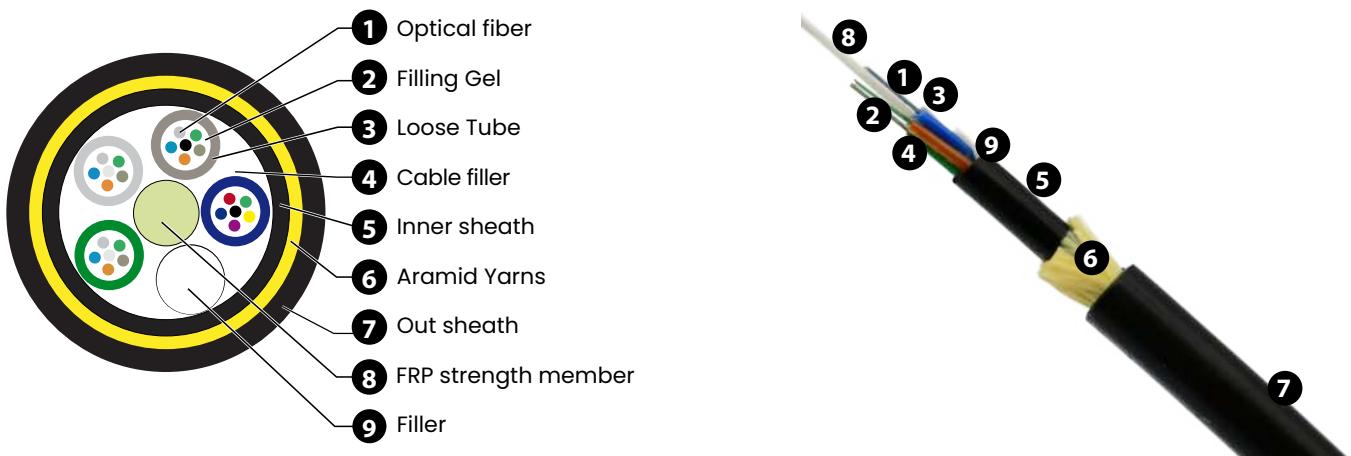

Description

The ADSS cable is a type of fiber optic cable designed to support its own weight without the need for metallic support elements, making it ideal for aerial installations in electrical environments, providing greater safety and faster deployment.

Structure of the ADSS Cable - Single Jacket

Structure of the ADSS Cable - Double Jacket

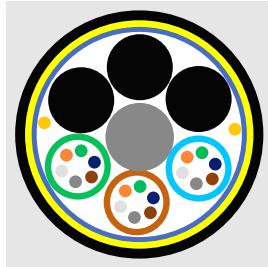

ADSS

All-Dielectric Self-Supporting
FIBERS

Cablix™

FULLY CUSTOMIZABLE CABLES

Optical Fiber Premium

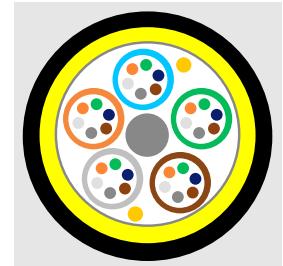

Ideal for high-reliability deployments in hostile environments and extreme conditions.

Scenario: Installations in regions with extreme climates (high or low temperatures, high humidity) or areas prone to natural disasters. Perfect for rural areas and regions with challenging geography (mountains, dense forests), where resistance and durability are crucial.

Optical Fiber Standard

Essentials for quality connectivity in a variety of installation and deployment environments in external plant.

Scenario: Installations in metropolitan area networks (MAN), deployments in densely populated cities, and rural areas. Suitable for trunk and backbone networks, where specific performance, durability, and reliability characteristics are required.

Jacket

If **VJ** equals **SJ**, then it indicate a **Single Jacket**.

If **VJ** equals **DJ**, then it indicate a **Double Jacket**.

ITU-T Standard

If **T** equals **2**, it is **G652**

If **T** equals **5**, it is **G655**

If **T** equals **7**, it is **G657**

Span in meters

If **XX** equals **80**, then it means a span of **80 meters**.

If **XX** equals **100**, then it means a span of **100 meters**.

If **XX** equals **120**, then it means a span of **120 meters**.

If **XX** equals **150**, then it means a span of **150 meters**.

ADSS - **09G65TUUU-VJXXZ-YY**

09 Micrometer

Single mode fiber

Fiber count configuration

If **UUU** equals **006**, then it has **6** cores

If **UUU** equals **012**, then it has **12** cores

If **UUU** equals **048**, then it has **48** cores

If **UUU** equals **096**, then it has **96** cores

If **UUU** equals **144**, then it has **144** cores

Only for Standard cable

Made in

If **YY** equals **IN**, then it indicates it's **made in India**.

If **YY** equals **CN**, then it indicates it's **made in China**.

ASU

All-Dielectric Self-Supporting Unitube

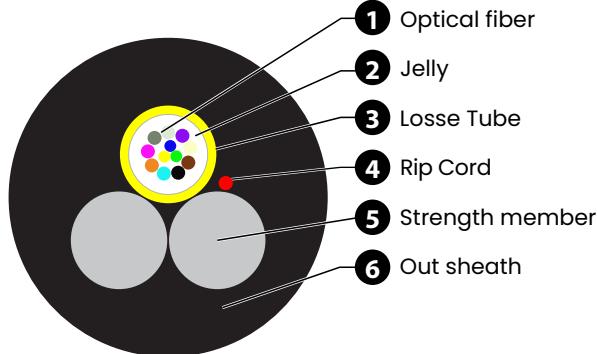

FIBERS

Cablix™

Description

The ASU cable is a type of fiber optic cable designed for aerial applications where quick installation is required without the need for additional metallic supports.

Structure of the ASU Cable

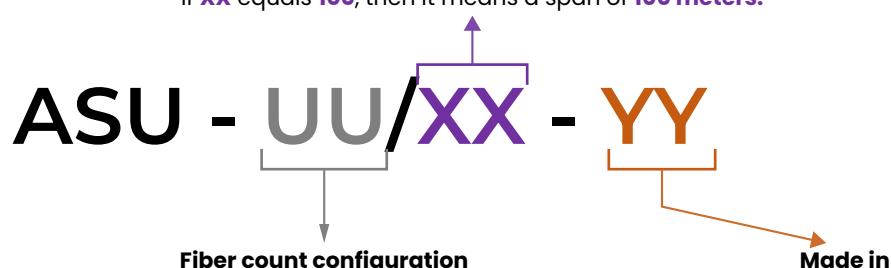

FULLY CUSTOMIZABLE CABLES

Span in meters

If **XX** equals **80**, then it means a span of **80 meters**.

If **XX** equals **100**, then it means a span of **100 meters**.

Fiber count configuration

- If **UU** equals **04**, then it has **4** cores
- If **UU** equals **06**, then it has **6** cores
- If **UU** equals **08**, then it has **8** cores
- If **UU** equals **12**, then it has **12** cores
- If **UU** equals **24**, then it has **24** cores

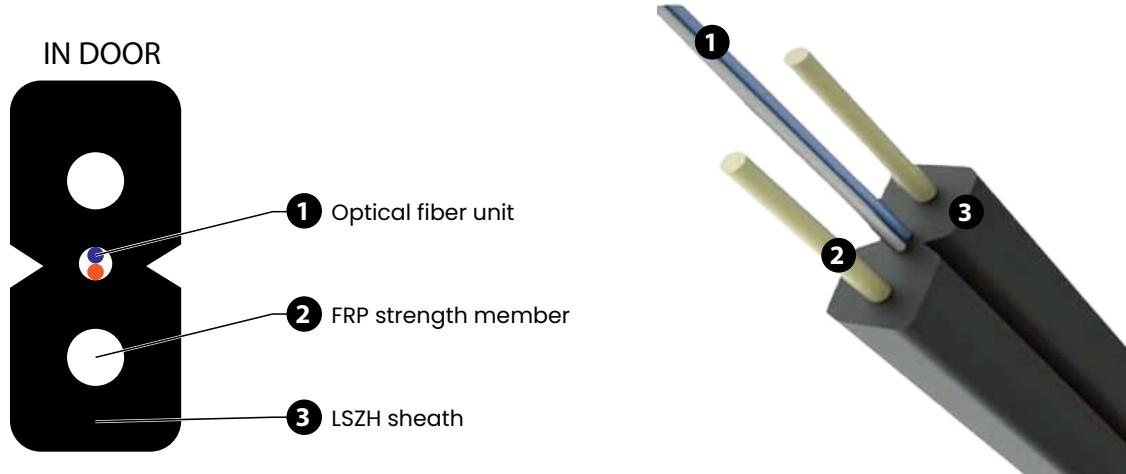

If **YY** equals **IN**, then it indicates it's **made in India**.

If **YY** equals **CN**, then it indicates it's **made in China**.

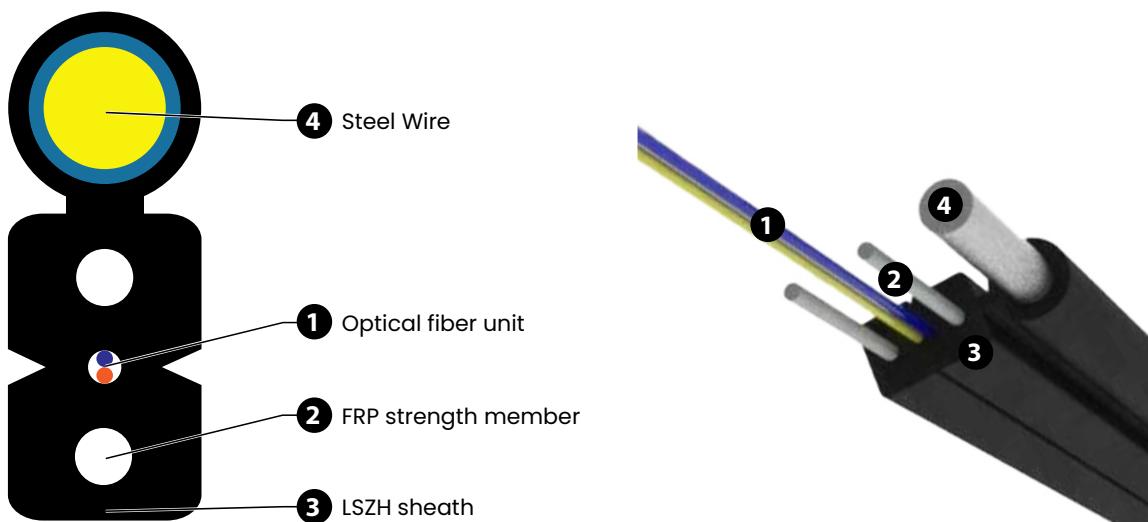

Certified Optical Fiber from a Japanese Brand.

Ideal for customer connections in urban environments. Its durability and flexibility ensure easy installation and superior performance in challenging conditions. Perfect for deployments in dense metropolitan areas, it guarantees a stable, high-quality connection, resistant to temperature variations and exposure to outdoor elements.

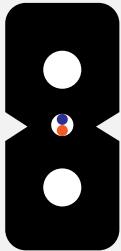

Structure of the DROP Cable Indoor FRP- G657A2 9/125

Structure of the DROP Cable Self Supporting With Messenger Steel/FRP

FULLY CUSTOMIZABLE CABLES

Flat Drop Cable Indoor FRP- G657A2 9/125

The Drop fiber without messenger is special for its flexibility, G657A2 fibers, and LSZH jacket. Ideal for indoor use, it ensures easy and safe installation, providing stable and high-quality connections in FTTH networks.

Flat Drop Cable Self Supporting With Messenger Steel/FRP

The Drop fiber with messenger is essential for its flexibility, G657A2 fibers, and LSZH jacket. Ideal for both indoor and outdoor use, it ensures easy and safe installation, providing stable and high-quality connections in FTTH networks, even in complex environments.

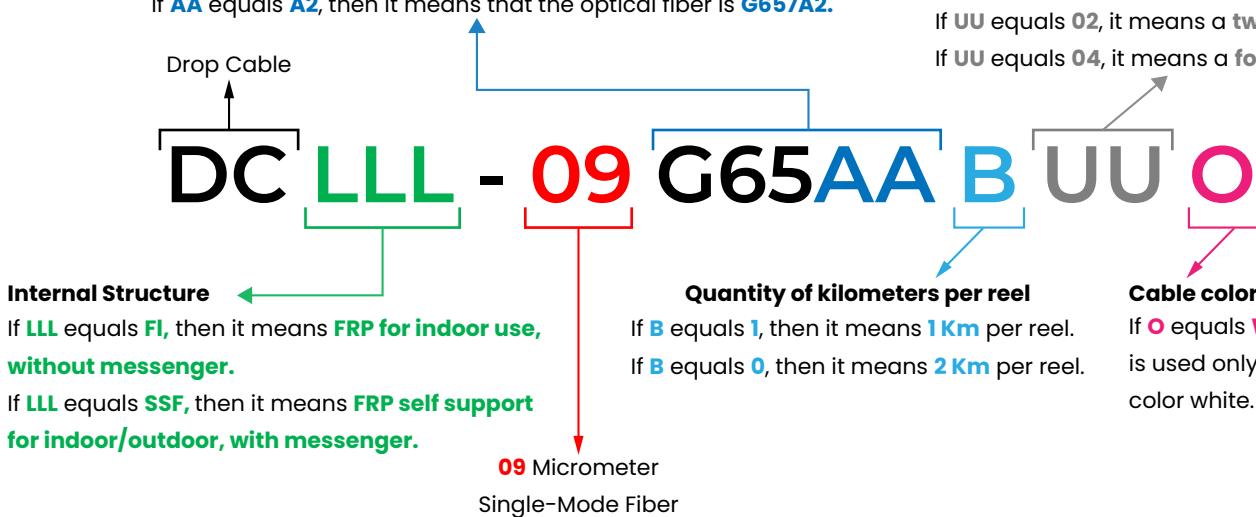

ITU-T Standard

If AA equals **2D**, then it means that the optical fiber is **G652D**.

If AA equals **A1**, then it means that the optical fiber is **G657A1**.

If AA equals **A2**, then it means that the optical fiber is **G657A2**.

Fiber count configuration

If UU equals **01**, it means a **single fiber** optic cable.

If UU equals **02**, it means a **two** optic cable.

If UU equals **04**, it means a **four** optic cable.

FULLY CUSTOMIZABLE CABLES

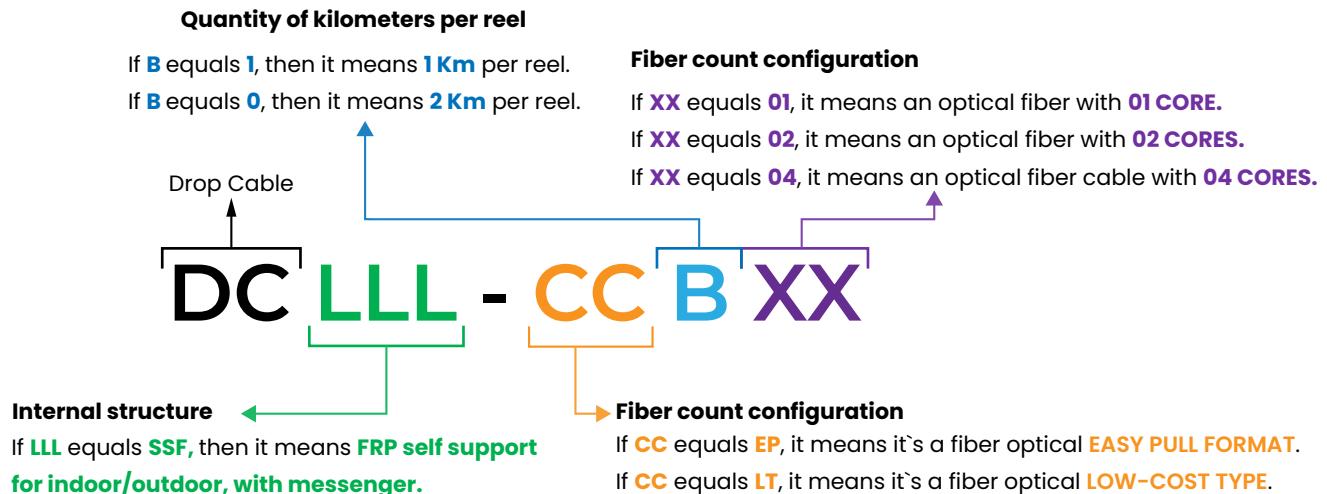

PREMIUM- Flat Drop Cable Easy Pull Self Supporting With Messenger Steel/FRP - G657A2 9/125 LSZH

The Easy Pull Drop fiber is flexible and features G657A2 fibers with an LSZH jacket. Ideal for both indoor and outdoor use due to its messenger wire, it ensures easy and safe installation with a special easy-unwinding system, providing a smooth and high-quality installation in FTTH networks.

STANDARD- Flat Light Drop Cable Self Supporting With Messenger Steel/FRP - G657A1 9/125 LSZH

Ideal for customer connections in urban environments. Its durability and flexibility ensure easy installation and superior performance in challenging conditions. Perfect for deployments in dense metropolitan areas, it guarantees a stable, high-quality connection, resisting temperature variations and exposure to outdoor elements.

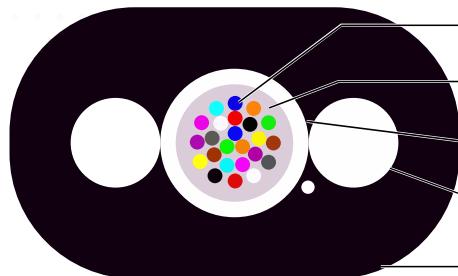

DROP

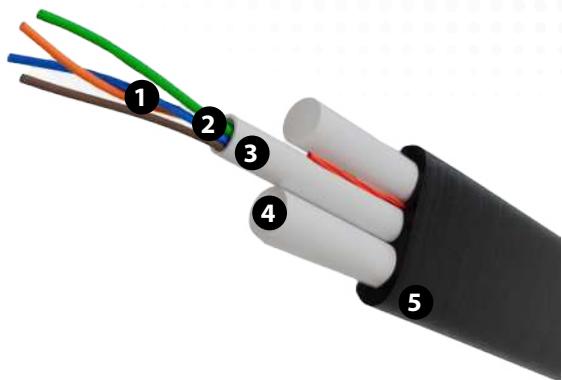

PREMIUM-Figure 0 Drop Cable

Cablix™

Without Water Blocking Tape

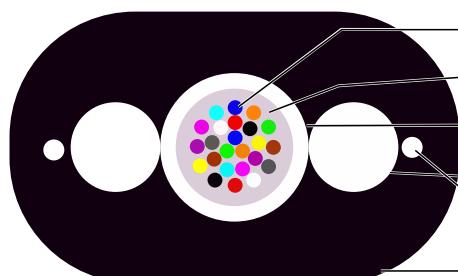

- 1 Fiber
- 2 Tube filling compound
- 3 Loose Tube
- 4 FRP
- 5 PE-Sheath

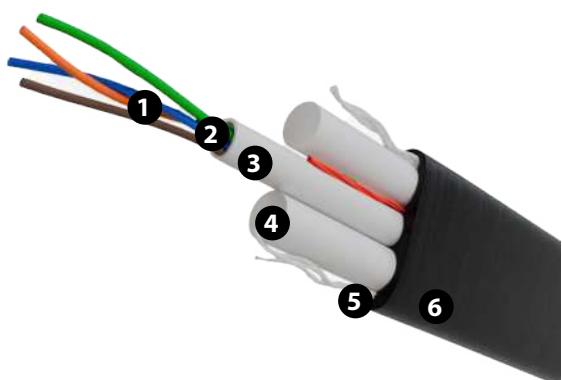

Cable Drop Figure 0, ideal for FTTH-type indoor-outdoor applications, data networks, security systems, and Telecom. It is 100% dielectric and easy to install with G652-D or G657A2 optical fibers, without water-blocking materials.

Water Blocking Tape

- 1 Fiber
- 2 Tube filling compound
- 3 Loose Tube
- 4 FRP
- 5 Water blocking material
- 6 PE-Sheath

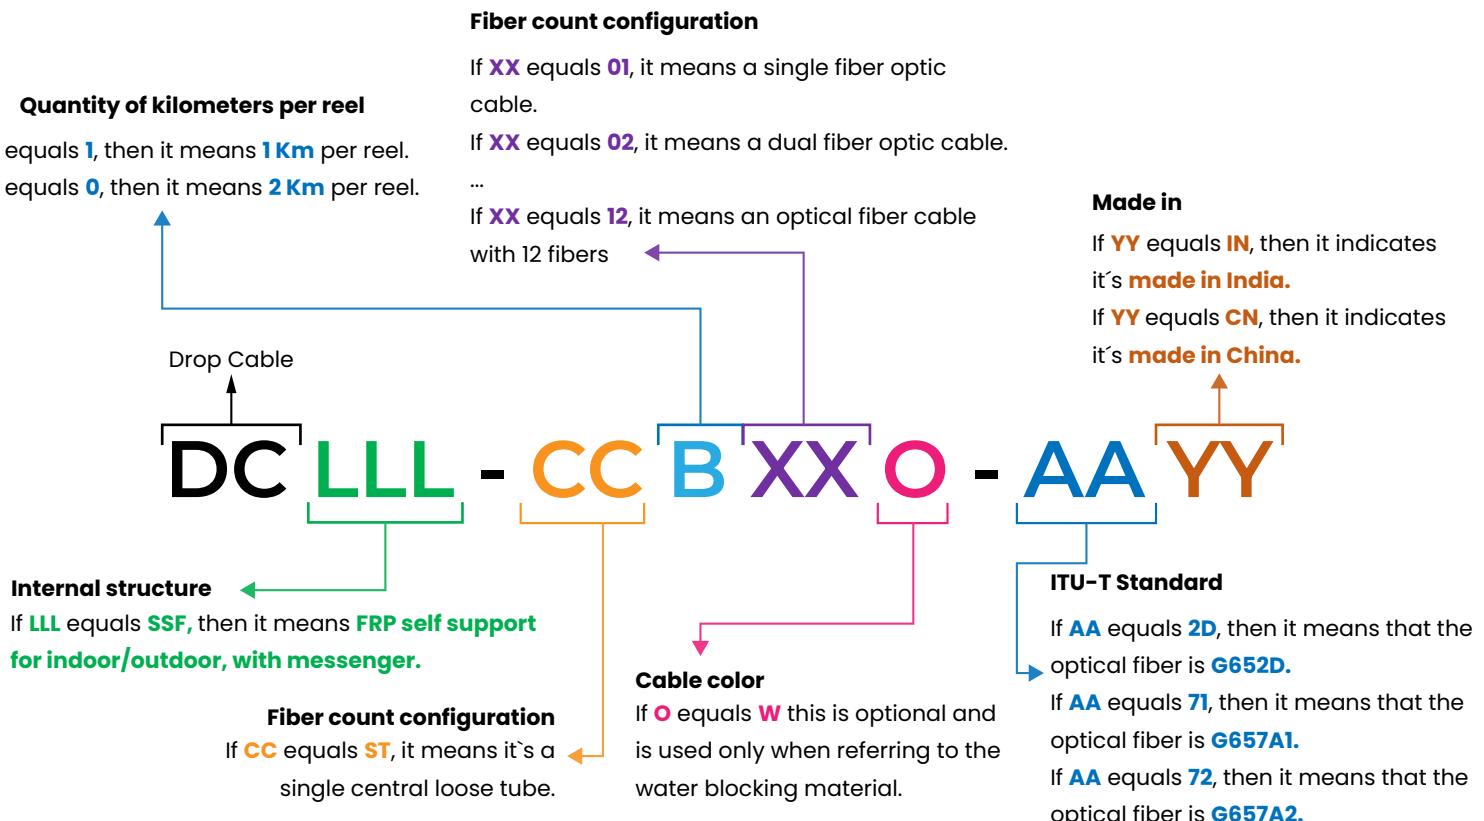

Cable Drop Figure 0, which is ideal for FTTH-type indoor-outdoor applications, data networks, security systems, and Telecom. It is 100% dielectric and easy to install with G652-D or G657A2 optical fibers, featuring water-blocking materials.

Patch Cords

Specification

Item	Technical Parameters		Item	Technical Parameters	
Connector Type	LC/SC		Polish Type	UPC/APC	
Fiber Mode	G657A2		Wavelength	1310/1550 nm	
Fiber Count	SX/DX		Operations Wavelength(hm)	1310 nm and 1550 nm	
Insertion Loss	≤0.3dB		Return Loss	UPC≥50dB, APC≥65dB	
Minimum Bend Radius	30mm		Cable Diameter	3.0mm	
Cable Jacket	PVC/LSZH		Jacket Color	Yellow	
Polarity	A(Tx) to B(Rx)		Operating Temperature	-20° -85°C	

Patch cord length.

If **LL** equals **10**, it's means that the patch cord is 1 meter in length.

If **LL** equals **15**, it's means that the patch cord is 1.5 meter in length.

If **LL** equals **100**, it's means that the patch cord is 10 meters in length.

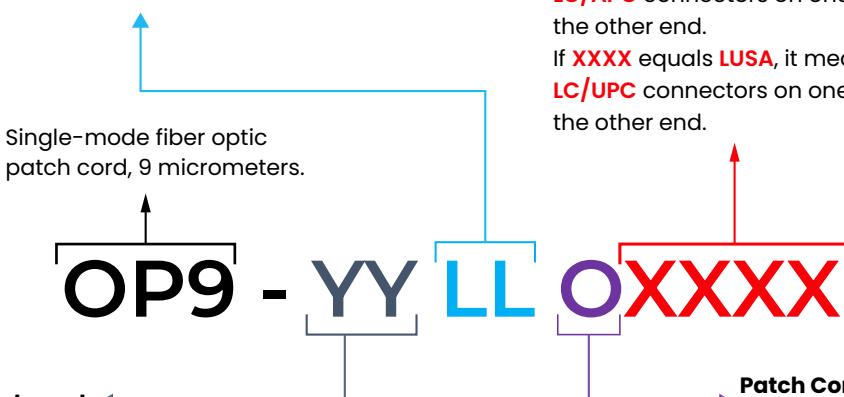

If **LL** equals **150**, it's means that the patch cord is 15 meters in length.

.

.

.

If **LL** equals **N**, It's means that the patch cord is N meters in length.

Connector type in the patch cord

If **YY** equals **06**, it's means that the patch cord has **SC** connectors on both ends.

If **YY** equals **11**, it's means that the patch cord has **LC** connectors on both ends.

If **YY** equals **77**, it's means that one end is **SC**, and the other end is **LC**.

Quantity of kilometers per reel

If **XXXX** equals **A**, It's means that the connectors are **APC** on both ends.

If **XXXX** equals **U**, It's means that the connectors are **UPC** on both ends.

If **XXXX** equals **LASU**, it means that the patch cord has **LC/APC** connectors on one end and **SC/UPC** connectors on the other end.

If **XXXX** equals **LUSA**, it means that the patch cord has **LC/UPC** connectors on one end and **SC/APC** connectors on the other end.

Patch Cord Duplex or Simplex

If **O** equals **S**, it means that the patch cord is simplex.

If the patch cord is duplex, the part number does not require the **O** variable.

Optical Patch Panel

Description

Fiber optic patch panel is an integrated unit for fiber management, Cablix offer wall mounted fiber optic patch panel and rack mounted fiber optic patch panels, these equipment function is to fix and manage the fiber optic cables inside the box as well as provide protection. Different models to fit for 24 core fiber, 48 core fiber, 144 core fiber applications. They can be with different adapter interface including the SC, LC. related fiber accessories and pigtails are optional.

Application

- Optical Access Network.
- Data Processing Centers.
- Cable Television.
- Local Area Network.
- Coarse Wavelength Division Multiplexer.

Specifications

Model	Max Capacity	Connectors	Dimension	Splice tray	Optional
1U	24 cores	SC, LC	435 x 317.3 x 45.5 mm 430 x 350 x 43 mm	12F	Black or Beige
2U	48 cores	SC, LC	438 x 326.5 x 99.7 mm 430 x 350 x 85 mm	12F	Black or Beige
4U	144 cores	SC, LC	435 x 294 x 178 mm 430 x 350 x 165 mm	12F	Black or Beige

Snowshoe Fiber Storage Clamp

Description

The snowshoe fiber storage clamp is an element for storing the cable reserve in the connections when aerial fiber optic installations are made. It can be placed directly on the ADSS cable without damaging it thanks to the included accessories. Made of high impact UV resistant thermoplastic resin.

Features

- Made of high impact thermoplastic resin.
- Not corrosive.
- Fully dielectric to incorporate reinforced thermoplastic clamps.

Component

- 2 pairs of plastic cable holders.
- 10 plastic safety straps.
- 4 screws with washer and lock nut.

Technical Data

Model	OFT-SC1
Material	Thermoplastic
Length (L±5%)	17.63" (447.80mm)
Outer storage diameter (OD±5%)	13.10" (332.74mm)
Internal storage diameter (ID±5%)	12.00" (304.80mm)
Operating temperature	-40°C - 85°C
Modulus of elasticity	340Ksi
Dart impact	565Lbs/in.
Free fall impact	900Lbs/in.
Deflection temperature	132°C

Spiral Vibration Damper

Spiral Vibration Damper

OFT-SVD-XX

Description

Spiral vibration damper is made of high strength, antigenic and high-elasticity PVC plastic, easy to install and operate. It's an interference type damper to attenuate vibration amplitude by impact with its damping section and especially designed for ADSS cable, or OPGW cable with cable diameter less than 12mm.

Preformed ADSS fitting

The Tension Dead End is used to connect cable and pole or tower for ADSS cable line, and clamp can protect cable and help cable to reduce vibration

Light Tension Dead End For ADSS

PRODUCTS

Optical Fitting

Preformed ADSS fitting

Description

The light tension dead end is a dead-end designed to terminate short span, low tension ADSS fiber optic cables in low voltage environments. The light tension dead-end is reduced to a single layer component that offers an economical solution for very light loads. The product effectively transfers the low axial load on the cable at the end of the dead-end legs to low uniform radial compression near the dead-end loop. Be made of galvanized steel wire or aluminum clad steel and preformed into the process when prefabricated beam, inner wall layer of emery stick, and enhance the friction between clamp and cable.

Medium Tension Dead End For ADSS

Description

The medium tension dead end has been designed to securely but gently terminate ADSS aerial fiber optic cables. A two component design consisting of appropriate size and length of structural reinforcing rods and dead-end component is required to transfer axial tensile loads and distribute radial compressive forces through the plastic jacket and onto the internal strength members without damaging the fragile plastic jacket or internal optical fibers. Be made of galvanized steel wire or aluminum clad steel and preformed into the process when prefabricated beam, inner wall layer of emery stick, and enhance the friction between clamp and cable.

Preformed ADSS fitting

Suspension Clamp

OFT-STL14
Strand link 1/4", Steel Guy Wire Universal Grade

Material: Steel alloy
Wire range: 6.0mm – 6.8mm
Dimension: X = 163mm Y = 23.2mm

OFT-CSAE 10
Cable storage assembly for tower

Material: Hot rolled steel
Coating: Hot-dipped galvanized
Cable Diameter: <18.8mm

OFT-CSAE 12
Cable storage assembly for pole

Material: Hot rolled steel
Coating: Hot-dipped galvanized
Cable Diameter: >18.8

OFT-CSAE 08
Storage bracket

Material: Hot rolled steel
Coating: Hot-dipped galvanized
Cable Diameter: <14.8

PRODUCTS

Optical Fitting

Preformed ADSS fitting

Suspension Clamp

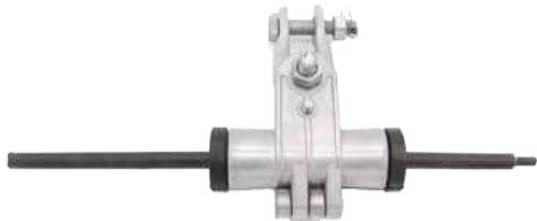

OFT-MP10
Heavy Duty Mounting

Material: ASTM A-36 Steel Structure
Galvanizing method: ASTM A 123

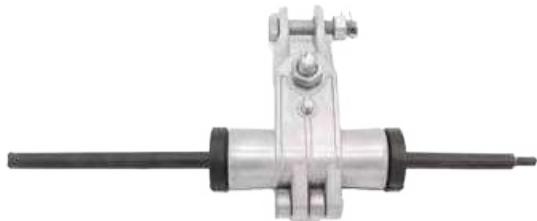

OFT-STV1496
Universa Strandvise, 1/4" all grade strand

Material: Galvanized Steel and
Strand Material: Aluminized steel strand

OFT-SCCS-1416
ADDS suspension clamp short span

Anchor shackle: Hot-dip galvanizing stee.
Housing: aluminum alloy.
Rubber inserts synthetic rubber

OFT-SCCS-1214
ADDS suspension clamp short span

Anchor shackle: Hot-dip galvanizing stee.
Housing: aluminum alloy.
Rubber inserts synthetic rubber

Suspension Clamp

OFT-SCC
ADDS suspension clamp short span

Keeper Material: Aluminum Alloy.
Cushion Inserts Material: Synthetic Rubber.
Captured Bolt & Washer: Stainless Steel

OFT-SCH 1015
ADDS suspension clamp Long span
Material: Hot dip Galvanized Steel
Sleeve: Neoprene
Screw: Protected Steel

OFT-SCH-1416-300
ADDS suspension clamp

Material: Hot rolled steel
Armor rod: hot dip galvanized
Housing: aluminum alloy.
