

JBX-1174

19" Fiber Optic Outdoor Cabinet

The Fiber Optic Junction Box (1150 × 700 × 400 mm) with integrated 19-inch support, finished in RAL7035 and IP65-rated, is an outdoor enclosure designed for optical nodes in access networks. It accommodates standard 19-inch rack-mount patch panels and ODF units.

Features:

- High mechanical strength and excellent corrosion resistance.
- Withstands rapid temperature changes and harsh outdoor environments.
- Capacity can be tailored to project requirements.
- Quick, convenient installation.
- Optimized fiber-routing layout simplifies management and maintenance.
- Includes secure cable fastening and reliable grounding/earthing protection.
- Compatible with flat (figure-8/strap) and round fiber-optic cables.

Applications:

- FTTH access network
- Telecommunication Networks
- CATV Networks
- Data communications Networks
- Local Area Networks
