Optic Face Plate Indoor (White)

Fiber Optic Faceplate (Wall Outlet) — Indoor termination point for FTTH/FTTx customer premises. Molded from high-quality ABS for durability and a clean finish, this compact wall-mounted outlet provides a neat handoff between the building cabling and the subscriber equipment. It accepts up to 2 × SC simplex adapters and includes an integrated splice area for up to 2 fibers, enabling quick, reliable terminations at the end user location.

## Key features

- High-quality ABS construction; smooth, professional appearance
- Wall-mounted indoor design for FTTH/FTTx applications
- Supports up to 2 SC simplex adapters (1 or 2 drops)
- Integrated splice management for 2 fibers
- Clear internal routing to protect bend radius and simplify maintenance
- Quick installation with screw or adhesive mounting options (hardware as supplied)

## Typical use

- Apartment/house subscriber outlet, ONT handoff, MDU/office drops
